PROJECTS

➤ Car Rental Service Website

• Tech :- J2SE, J2EE (JSP + Servlets), Spring boot , HTML, CSS, JavaScript, Bootstrap, MySQL.

• Project Details:

- This project aims to provide an online platform for users to easily rent vehicles for various purposes.
- The website will offer a user-friendly interface where customers can browse 'available vehicles, check their specifications, view rental rates, and make reservations'.
- This project is the implementation of a backend web application where we can create, read, update and delete (CRUD) customer information.
- This exciting CRUD application will be built using Spring MVC and MySQL.

➤ Online Vegetable Store Website

• Tech :- J2SE, J2EE (JSP + Servlets), Spring boot , HTML, CSS, JavaScript, Bootstrap, MySQL.

• Project Details:

- This project aims to create an e-commerce platform where users can conveniently purchase fresh vegetables online.
- The website will offer a user-friendly interface with categories for various types of vegetables, allowing customers to browse through a wide selection of products.
- Users will be able to add items to their cart, specify quantities and proceed to checkout securely.
